

Kandiyohi Power Cooperative

2025 DISTRICT 1 DIRECTOR PROFILE

3 YEAR TERM

Dale Anderson

Profile: My name is Dale Anderson. I live on a farm in the northern part of Kandiyohi county. On our farm we grow corn, soy beans, and hay. We operate a cow/calf herd of 100 beef cattle. We also have 4500 pigs that we feed and finish. We will run about 800 acres of cropland and pasture.

I'm married to Debra Anderson and we have three sons Jordan (Amber), Justin (Mandy) and Levi (Shanda) Anderson. I am also the proud "Papa" of nine beautiful grandchildren.

Hobbies: Some of my hobbies are hunting, fishing, woodworking, and I also enjoy being outside, working with the animals, and spending time with my family.

Primary goals as a director: I see the importance of keeping rates stable and affordable. There is a need for balance between renewables, load and providing reliable service for our members. We need to keep electric costs affordable for all people while providing service to improve the quality of the lives of our members. The electric industry is constantly changing, and we need to be able to embrace the changes that are coming in our future and do our best for our members.

What do you see in the future for Kandiyohi Power Cooperative? I think that we need to find balance for renewables and reliability, and encourage members to work with co-ops to conserve and manage the electric use. Transmission will also be a key issue in the coming years in order to make our power reliable. There's always a need for good transmission, and I think we will need to be active to make sure our transmission lines and distribution lines are capable of handling the continued use of electricity in the future.
